

Warning This is a sample re-write

Letting you know upfront that I wasn't hired by the author to re-write this one..
These are existing stuff I found of products I admire

And I'm showing you how I would improve the copy if you hire me to re- write it

Actually I did send some of these to the authors.. saying

 "HEY LOVE YOUR CONTENT.. I GOT SOME NOTEWORTHY SUGGESTIONS FOR YOUR LANDING PAGE THAT COULD IGNITE YOUR CONVERSION, & SUBSTANTIALLY BOOST YOUR SALES.."

 "HAVE A LOOK , & IF YOU WANNA USE IT GO AHEAD, IF NOT TOTALLY COOL, NO STRINGS ATTACHED"

If they approve it I'll link directly to their website for you instead of Gdocs 😊
With that out of the way..

Here is the  [original](#)

& Here is how I would rewrite it ... enjoy  

Master 3D Sculpting in Blender

The Ultimate Guide to Digital Sculpting

Version 2.0 out now

More killer chapters coming soon

( Scroll down to find out)

Latest cutting-edge addition (August 2021):
New "Epic Creature Base Sculpting" chapter added

[Enroll Now For Just 59\\$ + Tax](#)

Now Updated Big - Rock-solid support for blender 2.9+/Blender 3.0

Master 3D Sculpting V2.0 is packed with new updates & features that allows you to do more with Blender3D than ever before

We updated our best-selling course to work 100% full, seamless with the latest cutting-edge versions of Blender3D. Enjoy the biggest update we've ever made since this course was made (around 2017).

Doesn't matter if you've been away for a while or about to join, you get all this 100% FREE of charge. No Catch

But wait..... There's more!

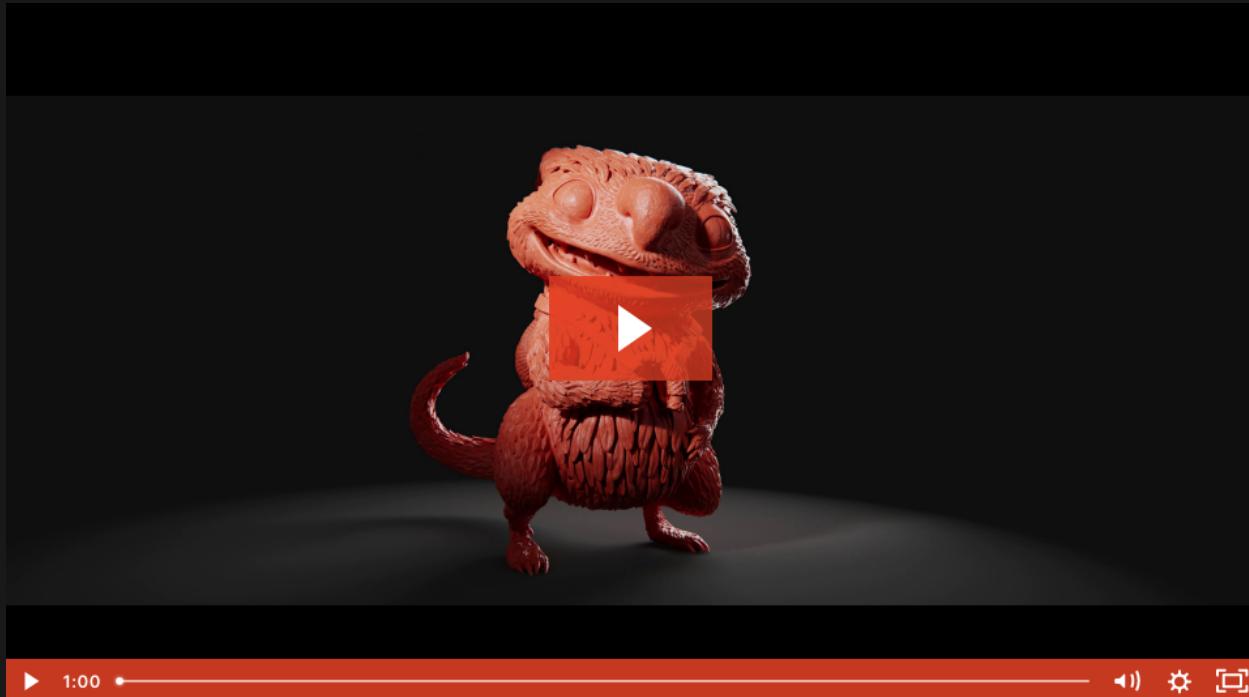

Look out for even more new exciting parts coming to your course very soon. Perfectly free for all students that already bought (or will buy) this course.

No Strings attached 😊

The course has an insane rating of

4.9 rating of 60 reviews

Learn to create the most mind blowing & memorable 3D Sculptings you'll ever be so proud off

We'll teach you all the sculpting foundations & show you precisely how to create stunning 3D sculptures from scratch, with only open-source free tools.

We're gonna assume you've got the hang of the basics (doesn't have to be perfect), & now you want to dive into the sculpting world because you want to level up your skills

Forget Random tut..

- It's not your fault you're lost. Randoms are a heck of a mess. They're often out of date
- All they do is give you bare basic ideas.. THAT'S IT..
- They never teach you how to truly craft the gorgeous sculptures you admire in Artstation

- They'll never show you the proven step-by-step strategies how to get the results you want

At best you'll scratch the surface if you are lucky.., at worse you'll hit dead ends from the endless learning rabbit hole

Either way your progress will be molasses-slow

That is why we created this comprehensive course to cover your back, give you the easiest, engaging & fun digital sculpting guide you'll ever need today.

If you're tired from struggling for months & months.. Then this course is for you

Don't worry..no previous sculpting knowledge is required. We drill the core fundamentals into your head, with plenty of straight-forward exercises

We'll give you the exact step-by-step walkthrough for the advanced sculpting workflows.

Get excited..Once you go through this course, do the small sculpting exercises, & craft your first super high-quality creature sculptings that means business

you'll then have the power to turn any 2D characters, creatures, or concepts into a bomb-ass digital sculpture. 🎉

Stay Sane! Get everything you need to learn about digital sculpting in ONE place. Right [HERE](#)

- We'll teach all the important stuff to kick-start your digital sculpting journey in Blender3D immediately.
- We cover the important brushes, tools, settings and workflows
- You'll learn the full sculpting process
- Get your sculpting fists dirty with multiple challenges & practical exercises.

We're leaving nothing out of this course. Everything we know about crafting incredible sculptures is included right here. You're going to learn the best sculpting skills that will last a lifetime.

If you want to speed up your learning

If you're tired of playing the nasty "hunt & gather" for online videos all over.
Then this could be the biggest game-changer class you'll ever take today

We genuinely want to help you hit the most incredible results with your sculptures

New to the whole Sculpting business?

PERFECT: because our dedicated quality- contents are specifically designed to serve both you beginners & intermediate artists alike. Regardless if you got little knowledge or never ever sculpted in your life

But...

👉 We're gonna assume you're familiar with how to use Blender in general, like navigation, how to scale, extrude, basic modeling tools and these fundamental stuff.

So.. If you're a total newbie.. Then

1. We strongly suggest you grab our comprehensive **Blender Launch Pad** course first
(There is special discount at checkout when you order this course today)
2. Also you can learn the fundamentals in our **free Blender Beginners** course

Either way.. You're all covered.. All your fears & doubts squashed now

The only thing stopping you from reaching your success is that you don't have the right system..
The right tools, and **you don't know the right techniques**

Say good-bye to the pesky paid add-ons & tools

All in-one-place right with the open-source blender you love. No need for fancy extras here. Should there ever be a need.. We'll show you only the foxy free addons/tools that we're confident will turbo-charge your models & make your life easier.. **That's it..**

We hold your hands on the go

If your toes hit a rock, stuck.. Don't freak out

Because you have an excellent discussion section under each lesson at your disposal.. Poke us there anytime

If you want to make major changes in your skills.. you're gonna need this. Our best team & your fellow students will be happy to help you out.

No one succeeds alone! Get connected with other sculpting geniuses, with our team, & get the help & support you need to achieve your dream

PLUS - get exclusive access to our private members-only CG Boost Community

The perfect place for you to connect with other aspiring CG artists, ask questions, give & receive feedback & grow together.

Now you'll never be alone on your way to the top.

Seriously..Stop wasting time googling

This is the perfect bundle that will power up your blender skill
and turn you into a complete [modeling badass](#)

Biggest value bomb to your money: & cost is just tiny fraction of all the courses out
there you'll ever get

Meet Your Instructor

Zach Reinhardt is the founder of CG Boost and a passionate 3D artist and instructor, he will guide you through this course, & show you how to get bombass results

"Getting started into the world of Blender and 3D, can be really frustrating and overwhelming. I know exactly how that feels. When I started with Blender and 3D in 2004, I had no one explaining to me how all of this works, I had no YouTube tutorials and basically no internet.

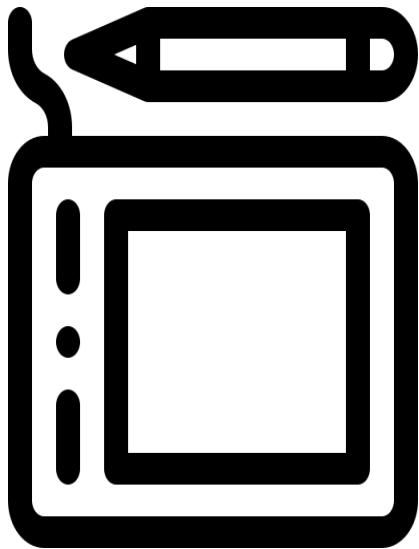

I had to figure out many things on my own, which was sometimes really painful and took me a long time. But this doesn't stop me from pursuing my dreams and eventually becoming a freelance 3D artist and instructor, making my living with Blender, 3D art and education.

Although it was worth all the trouble in the end, now looking back at my beginnings, I wished I had someone taking me by the hand and guiding me, to understand, how to create beautiful 3D art.

In my experience working on client projects as a freelance 3D artist and teaching Blender to companies, freelancers, and individuals in the past for 7+ years, I've identified typical pain points that can make your 3D journey unnecessarily hard, when learning Blender.

That's why I carefully craft Blender courses, so you don't have to go through the same troubles I had to go through, and make your way into the 3D world less painful and more fun."

We HIGHLY RECOMMEND that you grab a Graphics Tablet instead

Sculpting with a mouse ain't fun (yes possible but the result ain't pretty)

Do yourself a favor and pick up a tab for this course. Any tablet that comes with a pressure sensitive pen will provide you with much MUCH more intuitive, amazing & realistic sculpting experience

Trust me.. the difference is just phenomenal

Once you do, you'll never want to use your mouse again. You don't have to be rich, buying a deluxe monitor drawing tab is probably a bad idea..!

Rest assured your classic purse-friendly tablet is more than enough for the job already . We recommend products from [XP-Pen](#) or [Wacom](#)

💡 Hint.. Got an old Bamboo Pen lying in the Garage? Then you're good to go

There... you got no more excuses 😊

Course Content

Enough bragging.. Lets show you what is in store for you below

PART 1 - SCULPTING FUNDAMENTALS

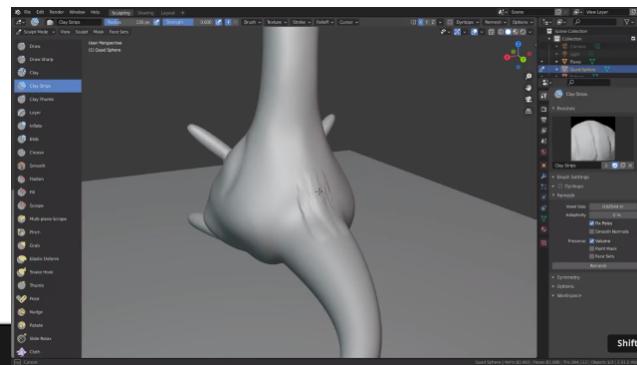

3 chapters | 33 lessons | ~3:58 hrs running time | Now available!

Your first order of business is to learn all the important fundamentals of sculpting in Blender. Including essential brushes, must-have tools & settings plus major workflows you'll wish you knew earlier. Next you'll get your hands dirty with easy practical examples.

PART 1 | Chapter 1 & 2 - Getting Started & Fundamentals

25 videos | ~3:08 hrs running time

This is where you'll make your very first brave steps into the exciting sculpt-mode world in Blender3D. You'll get to know all the important tools & workflows every 3d artist like yourself must know. Then you'll apply what you just learned immediately by going through simple exercises & get your feet wet

PART 1 | Chapter 3 - Base Meshes

8 videos | ~0:50 hrs running time

In this chapter, You'll understand how the different workflows work to create your base meshes, which are the foundation to start the sculpting process.

⚠ You can't build a great sculpt without a strong foundation first - Or Else, it will crumble..Don't MISS OUT on this one

PART 2 - CUTE CREATURE

4 chapters | 71 lessons | ~11:00 hrs running time | Now available!

YEEES.. The moment you've been waiting for..

Learn the full sculpting, retopology & coloring process of making your first stunning high-quality creature sculpting.

Here have a look what you'll get

Pretty darn wicked isn't it..?And we're afraid that's just the beginning

PART 2 | Chapter 4 - Cute Creature Base Sculpting

11 videos | ~1:25 hrs running time

We'll show you the clever reference 2D-concept techniques pros use to build a rock-solid mesh first, & why you should use them too. Then you can start sculpting, by adding med-tier level details.

No more wacky results

PART 2 | Chapter 5 - Cute Creature Retopology -

16 videos | ~1:56 hrs running time

How to retopologize your sculpture like a boss, the most powerful technique that you'll learn today. Becuz it allows you to make highly-efficient topology mesh, based on the shape of your sculpting without crippling performance

In fact... These are the secret techniques pros use to create the badass sculpt-based characters & monsters from your favorite triple A games without killing FPS

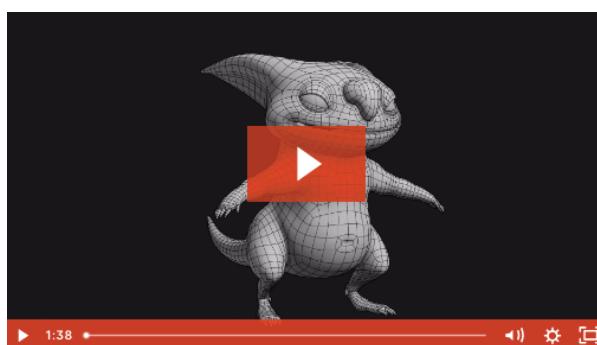

We're gonna share with you these priceless tactics that school didn't teach you.

But more importantly..

You'll take advantage of this new retnpo mesh & make your next big details that means business. You'll see how in the following chapters

Plus..

we'll reveal forbidden cheat codes you didn't know

PART 2 | Chapter 6 - Cute Creature Details

20 videos | ~3:28 hrs running time | Updated October 2021

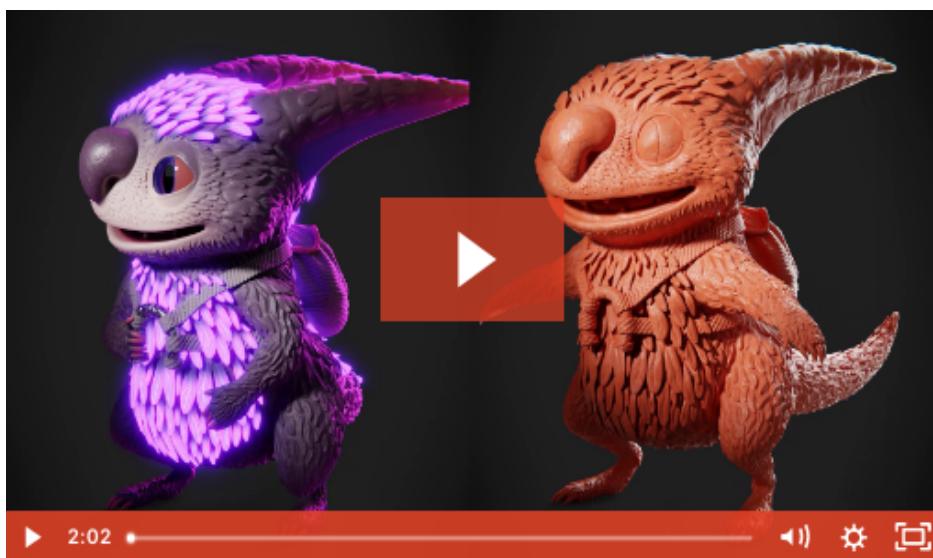

Get excited, you'll learn how to add your next high-res details that will blow your mind. Like the gorgeous details on the head & the beautiful fur.....You'll also discover the powerful cloth tools in Blender's sculpt mode, which we'll use to give a lunch backpack to your naughty boy

PART 2 | Chapter 7 - Cute Creature Presentation

24 videos | ~4:11 hrs running time

Here, you'll learn all you need to know how to make your sculpting look pretty. First you'll create a flexible clay shader that you can put on **any sculpture**. Then we'll pose the creature & color it with the **new Sculpt Vertex Colors & procedural shading methods**. In the end, we'll light it and render out still images & finally produce a glorious turntable animation of this creature.

PART 3 - EPIC CREATURE

Chapter 1 UP NOW | 16 lessons | 2+ hrs running time | Next one coming up February / March 2022

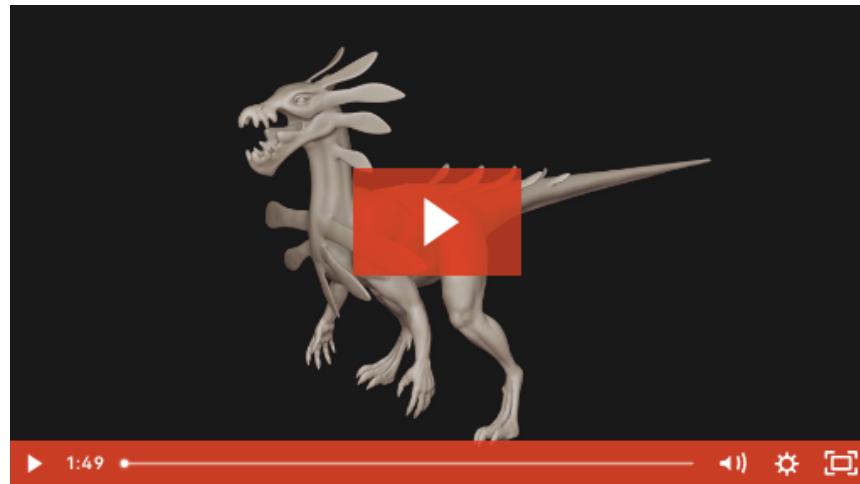

Now for the big masterpiece. Learn the full sculpting process of an epic complex creature, & uncover more powerful workflows.

PART 3 | Chapter 8 - Epic Creature Base Sculpting

16 videos | ~2:10 hrs running time

Crack your knuckles & bite your stylus. Time to learn an exciting creative sculpting workflow where you start with a simple sphere first.. Then we'll show the precise step-by-step how to build the base by sculpting the creature out of it. You'll understand how to use anatomy references to make the different body parts look more realistic. At the end you'll walk out from this class with a finished marvelous sculpting **minus** the fine details (these will be added in the following chapter).

PART 4 - BRUSHES AND SCULPTING SETTINGS (coming soon)

Coming after Part 3 was fully released | Included in the price

Get a detailed explanation of all the nitty-gritty of sculpting settings, tools and brushes.

Right...you already learned all the important sculpting settings, tools and brushes through part 1 to 3. Without a shadow of doubt all was good enough to let you create foolproof sculptings.

But.. if you wanna take a look under the hood: learn more how a specific sculpting feature works, what each slider or checkbox is doing behind-the-scenes..,

Maybe because you're hungry for more tweaks for even greater results..
Then part 4 is for you.

Possibly the most comprehensive guide you'll ever learn today....
